PROFESSIONAL EXPERIENCE

Kantar

Software IT Trainee | 01/2022 - PRESENT

I work with different databases and back-end and front-end contexts.

- Performance analysis and optimization of databases distributed in various geographical locations.
- Incident resolution and problem management.
- Design and management of reports and documentation.
- I work together with the team of developers to ensure a correct and efficient distribution of the database and its storage.
- Development of new applications and improvement of existing applications.
- Provision of information to databases.

Escola d'Adults Sant Boi

Trainee | 01/2018 - 06/2018

Management and documentation of relevant information in the computer system.

- Investigation of solutions to customer problems and data collection for their prevention.
- Hardware maintenance and repair, and implementation of failure prevention measures.
- Provision of support in the management of systems, networks, data and computer security.
- Installation of the necessary devices and resources for the different departments and remote work.
- Automation of system processes to perform backups, antivirus scans, etc.
- Support tasks for both employees and external customers of the company with connection or configuration problems.
- Identification of the customer's technical needs to expand the network, change the wiring, improve performance, etc.
- Creation of the technical documentation associated with the infrastructure of the networks and systems.
